

Google Code-in 2018

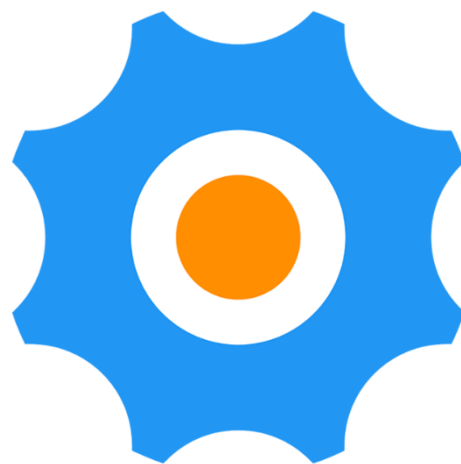

Task from openMRS

NAME OF TASK SUBMITTER:

Prathamesh Mutkure

TASK:

Define Requirements for Any Other Necessary Page.

ADDITIONAL PAGE:

Additional Page- **Archives Page**, I plan to use this page to **display the Archives**, of OpenMRS Tasks and the name of the **Finalist and Winners** of previous contests. I will be talking about the Implementation of this page below.

This page would be **simple though Informative for Contestants and also Outsiders.**

1. HEADER

The header should be the same across the whole website, it should be utilized to place the status bar along with the OpenMRS and GCI Logos, I have described the implementation of the header in my previous tasks submission.

2. FOOTER

Again, like header, the footer will also be same across the whole website, it will be utilized to put the social links of OpenMRS like its Twitter and Google Plus pages and it should also contain the OpenMRS logo.

3. IMPLEMENTATION

I plan to keep the implementation of this page **unique**, I plan to include a field on top of the page, which will ask the user to **select the contest year**, after which the page will first display a section which displays the list of **winners and finalist** for that particular year.

And then one more section below it, which will display all the **task** for that particular year contest.

4. FINALIST SECTION

This section will display the list of **names of Winners and Finalist** for that particular year from OpenMRS.

5. TASK SECTION

This section will display the list **all the Task from OpenMRS** for that particular year, in forms of long horizontal Tiles, it will also contain a View More button which when tapped, will bring up an Overlay page, which will display more details about that Particular tasks – **Exactly same implementation as the one in the Task Page, which I have already submitted.**

6. EXTERNAL LINKS

We can also provide other **External Contest Related Links** which may include links to:

- **Google Code-in website.**
- **OpenMRS website and Wiki page.**
- Other **helpful resources**, which may include links to the - About, Mentors, Contact, Home or any other pages of our website.

7. OpenMRS MISSION

The **OpenMRS Mission Tagline**, “***Write Code, Save Lives***” should be placed anywhere in the page, wherever it looks good.

THEME

Material Design Theme – With bright and vibrant material colors, rounded elements, and an overall attractive theme.
